1 About The Program

This exceptional Project Management Learning Program includes **classroom learning, online learning, MS Project 2010 Fundamentals, certification preparation**, exam, and PMI® membership (optional).

It is a full package of:

1. **12 hours** classroom learning covering the main topics of PMP® delivered over **2 Saturdays** to meet your busy schedule.
2. **Three months access** to the **35-hour** first Online PMP® Learning based on PMI® PMBOK® 4th edition launched world wide led personally by Ammar W. Mango, CSSBB®, PMP®, PgMP®, PSP. You can take this online program anytime you can during the three months period. The program is accredited by PMI® and is accepted as an **official fulfillment of the PMI® learning requirements**.
3. A one-day **Microsoft Project 2010 based on PMI® best practices** is also included in this unique package to help project managers using MS Project in managing their projects and to give assistance to follow PMI® best practices in project management. This day is delivered on another Saturday.
4. **PMP® Simulation-Exam access: A free access** to Method PMP® Simulation-Exam is also included in this program. This part helps you get ready and assess your readiness to apply for PMI® exams. Using tested and revised exams simulation built on PM learning experience, PMI® Exams Specifications, and the *PMBOK® Guide*.
5. **A promise from Method for you to re-take parts 1,2, and 4** (above) for free if you do not pass your PMP® exam on your first run.

This program is especially designed for people with tight schedules. It combines the **flexibility and the quality** of the online program offered by Ammar W. Mango with the live interaction and hands-on experience offered by the **classroom and lab sessions**.

This program is conducted by 3 highly professional instructors:

1. **Mr. Ammar W. Mango, CSSBB, PMP[®], PgMP[®], PSP:** A world-class Project Management Expert with an exceptional reputation for quality and leadership.
2. **Mr. Mohammad Amawi, PMP[®], PMOC:** A superior PM instructor and the Previous President of PMI[®] Jordan Chapter.
3. **Eman Nairoukh, PMP[®], MCTS, MCITP, MCT:** A solid Microsoft EPM consultant and deployment leader who has led many organization-wide deployment and customization projects of EPM for many leading organizations.

2 Target Audience

Persons interested in taking and passing the PMP® exam on their first try, in addition to Project Managers, Functional Managers, and team members who are looking for an understanding of project management, and who are looking for practical but effective ways to implement proper project management principles and methodologies on their projects.

3 Program Description

3.1 Program Objectives

- The program covers all knowledge areas of Project Management comprising :
 - Project Management Integration
 - Project Scope Management
 - Project Time Management
 - Project Cost Management
 - Project Quality Management
 - Project Human Resources Management

 - Completion Attendance Certificate of 4 hours on MS Project Learning.

3.4 Free Simulation Exam

There are so many sample exam questions out there on the internet and in books, but you will find out that none will be more helpful to help you assess your readiness to take the exam. Our 200 sample exam questions have been proven by many of our clients who took the actual exam to give you an indication of your readiness. The vast majority of clients find their score on the actual exam within ten points from their score on our sample exam.

"My score on the actual exam was very close to my score on the exam simulation provided by Method."

M. Arja, Applications Manager - Pepsi.

This did not come by coincidence, as the designer of these questions; Mr. Ammar W. Mango is a veteran PMP® trainer with twenty years of experience. He also has served as a volunteer to develop PMP® exam questions in the past.

The design of the PMP® sample questions in Method's PMP® Exam Simulation was done based on careful review of the PMP® Exam Specifications of the latest PMP® exam questions.

3.5 PMI® Standards applied in this Program

While many Project Management learning companies focus solely on the PMBOK®, Method learning program goes beyond the PMBOK® to apply PMI® best practices and standards identified in five important PMI® standards which are:

- **Standard One: Guide to the Project Management Body of Knowledge, fourth edition (PMBOK® 2008)** is the American National Standard Institute (ANSI) approved reference for project management. This standard is used to build the material in accordance to PMI's terminology and spirit in implementing project management
- **Standard Two: Project Management Competency Development Framework (PMCDF)** identifies the core elements of competency for project managers and provides key information on how to build these competencies.
This valuable standard is used to ensure that competency development activities during the program cover the core competencies identified by this standard and follows effective practices in building these competencies.
- **Standard Three: Organizational Project Management Maturity Model (OPM3)** provides description of the core elements of organizational maturity in project management. Unlike other programs, Method's comprehensive program also covers organizational maturity issues that greatly influence the project manager's ability to effectively and successfully manage projects.
- **Standard Four: Registered Education Provider standards (REP®)** which ensure that Method as one of the leading global registered education providers of PMI® follows the learning guidelines and quality standards set by PMI for its providers. PMI® reviewed method learning methodology and material and based on this review gave Method the REP® designation indicating PMI's approval of Method's curriculum and methodology in learning project management.
- **Standard Five: Code of Professional Conduct (CPC)** that stresses the ethical values and professionalism in project management.
